

Fox News Latino Cites IPC Fact Sheet in Article

Published on Mon, Jun 17, 2013

A recent Fox News Latino article drew on a recent fact sheet released by the Immigration Policy Center in an article on the economic impact of immigrants in Texas.

"A Texas congressman wants to know what the economic impact on the Lone Star State would be if it lost its estimated 1.4 million undocumented immigrants.

"Rep. Pete Gallego, a Democrat, believes the cost to Texas would be much higher now than a 2006 estimate done by the state comptroller. So his office has sent a letter to the comptroller asking for a more current analysis.

"In 2006, Comptroller Carole Keeton Strayhorn concluded that a loss of the undocumented immigrant population would have resulted in 'a loss to our gross state product of \$17.7 billion.'

"But a more recent report by the Immigration Policy Center this year put the economic loss at more than twice the last estimate, which Gallego's office said was the first such comprehensive effort by a state.

"If all unauthorized immigrants were removed from Texas, the state would lose \$69.3 billion in economic activity, \$30.8 billion in gross state product, and approximately 403,174 jobs, even accounting for adequate market adjustment time,' said the IPC report.
