

FACT SHEET

Examining Gaps in Digital Inclusion in Michigan

Introduction

The COVID-19 pandemic has vividly illustrated the economic and social costs of digital inequities—costs that have fallen disproportionately on people in marginalized communities, including immigrants, people of color, people with disabilities, and families living in poverty.

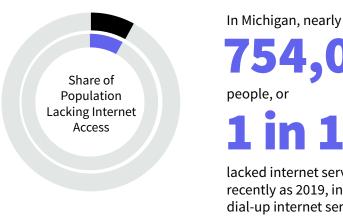

The inability to access high-speed, broadband internet makes participating in modern life difficult, especially given that information and services are increasingly provided online. Applying for a job, accessing education, finding information on public services or health matters, and much more depend on digital access. Past research has already shown the scale of the digital divide: As recently as 2018, more than one in five low-income households had no access to the internet, compared with only about 1 in 20 of all other households that didn't have access.

Income, however, is not the only factor that distinguishes differences in broadband access. The Digital Equity Act of 2021, as part of the landmark Infrastructure Investment and Jobs Act, identifies several covered groups of people who suffer disproportionately from gaps in access to broadband internet service.³ These populations include:⁴

- Individuals who live in households with an annual household income that is at or below 150 percent of the federal poverty level
- Aging individuals, defined as those 60 years of age or older
- Veterans
- Individuals with disabilities
- Individuals with a language barrier, including those who are English learners and those have low levels of literacy
- Individuals who are members of a racial or ethnic minority group
- Individuals who primarily reside in a rural area

In this report, we use data from the American Community Survey to examine the scale of the challenge and to see how many, and which, Americans could be helped by expanding broadband internet service.⁵

Michigan Overview

■ United States ■ Michigan

754,000 people, or

lacked internet service as recently as 2019, including dial-up internet service.

Nationally, nearly

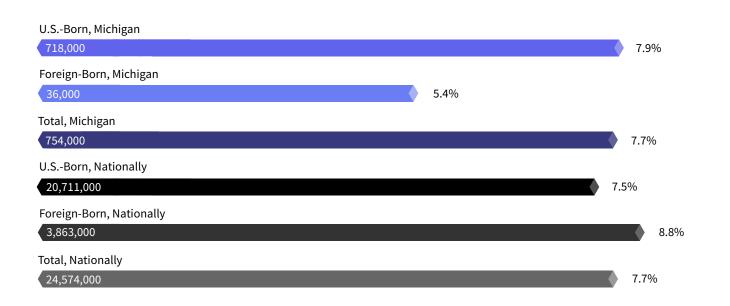

24.6M

people, or

1 in **13**

did not have internet access at home during the same period.

TABLE 1: SHARE OF INDIVIDUALS WITHOUT INTERNET, BY NATIVITY, 2019

If we look at high-speed, broadband internet access alone, then significantly fewer people have access at home. The access to high-speed, broadband internet is essential to the ability to work or study from home. In 2019, one in four, or 25.3 percent, of people in Michigan lacked access to broadband internet. In total, approximately 2,412,000 people were without broadband access at home.

Immigrants were less likely to lack broadband internet access than those born in the United States: 19.2 percent of immigrants lacked home broadband access compared with 25.7 percent of the U.S.-born. In total, approximately 125,000 immigrants did not have high-speed internet at home.

In addition to the internet, people also need a computer or tablet if they are to develop and maintain digital literacy or access the information and services increasingly offered online. In 2019, more than 1.2 million people in Michigan did not have access to either a desktop, laptop, or tablet computer.

Both immigrants and U.S.-born citizens face poor access to these digital tools, with 11.1 percent of immigrants in Michigan lacking access to a computer or tablet compared with 13.3 percent of U.S.-born individuals.

TABLE 3: SHARE OF INDIVIDUALS WITHOUT ACCESS TO A COMPUTER, LAPTOP, OR TABLET, BY NATIVITY, 2019

Broadband Access among Covered Individuals

People in Households at or below 150 percent of the Federal Poverty Level

Unsurprisingly, people in lower-income households had less access to high-speed internet at home. While 25.3 percent of the overall Michigan population lacked broadband internet in 2019, nearly half, or 46.9 percent, of people living at or below 150 percent of the federal poverty level did not have high-speed internet at home. Approximately 364,000 people in lower-income households did not have broadband internet access.

TABLE 4: INDIVIDUALS IN HOUSEHOLDS WITH INCOMES AT OR BELOW 150 PERCENT OF THE FEDERAL POVERTY LEVEL LACKING BROADBAND ACCESS, BY NATIVITY, 2019

	Population Lacking Broadband Access	Share of Population Lacking Broadband Access
MICHIGAN		
U.S. Born, Michigan	342,000	48.0%
Foreign-Born, Michigan	21,000	34.3%
Total, Michigan	364,000	46.9%
UNITED STATES		
U.SBorn, Nationally	9,054,000	47.5%
Foreign-Born, Nationally	2,031,000	44.7%
Total, Nationally	11,085,000	47.0%

Aging People (Those over 60 Years of Age)

Similarly, older people are more likely to lack high-speed internet at home. Over one in three, or 35.3 percent, of people in Michigan over the age of 60 did not have broadband internet at home in 2019. Approximately 830,000 people over the age of 60 did not have broadband internet access at home.

TABLE 5: AGING PEOPLE LACKING BROADBAND ACCESS, BY NATIVITY, 2019

	Population Lacking Broadband Access	Share of Population Lacking Broadband Access
MICHIGAN		
U.S. Born, Michigan	789,000	35.9%
Foreign-Born, Michigan	41,000	26.8%
Total, Michigan	830,000	35.3%
UNITED STATES		
U.SBorn, Nationally	20,083,000	32.8%
Foreign-Born, Nationally	3,175,000	31.0%
Total, Nationally	23,258,000	32.6%

Veterans

Veterans had broadband internet access at rates slightly higher than that of the overall U.S. population, with 32.1 percent of veterans in Michigan lacking high-speed internet access at home. Approximately 160,000 veterans did not have high-speed internet at home.

TABLE 6: VETERANS LACKING BROADBAND ACCESS, 2019

	Population Lacking Broadband Access	Share of Population Lacking Broadband Access
Total, Michigan	160,000	32.1%
Total, Nationally	4,494,000	27.0%

People with Disabilities

People living with disabilities were significantly more likely to lack high-speed internet access at home. In 2019, 36.6 percent of people with a disability in Michigan, or more than one in every three, did not have broadband internet at home. This is slightly higher than the national share of 35.9 percent of people living with disabilities who did not have broadband internet at home.

TABLE 7: PEOPLE WITH DISABILITIES LACKING BROADBAND ACCESS, 2019

	Population Lacking Broadband Access	Share of Population Lacking Broadband Access
Total, Michigan	486,000	36.6%
U.SBorn, Nationally	14,037,000	35.9%

Limited English Proficiency Speakers

Among those who speak a language other than English at home and speak English "less than well"—what we define as Limited English Proficiency (LEP) speakers—the rate of those without high-speed internet at home is significantly higher. Nearly one-third, or 30.4 percent, of LEP individuals in Michigan did not have high-speed internet at home in 2019. Approximately 38,000 LEP individuals were without high-speed internet.

TABLE 8: LIMITED ENGLISH PROFICIENT (LEP) SPEAKERS LACKING BROADBAND INTERNET ACCESS, 2019

	Population Lacking Broadband Access	Share of Population Lacking Broadband Access
Total, Michigan	38,000	30.4%
Total, Nationally	4,782,000	38.7%

7

Rural Residents

Rural communities disproportionately lack broadband coverage, often due to inadequate infrastructure networks. In 2019, more than half, or 53.3 percent, of people living in rural communities in Michigan did not have access to broadband internet. In total, approximately 792,000 people were without broadband internet at home.

Immigrants who live in rural communities were slightly less likely to face poorer access to broadband coverage in Michigan, with 48.6 percent of immigrants lacking access to broadband internet, compared to 53.3 percent of U.S.-born individuals.

The data show that almost 16 million residents of non-metropolitan counties in the United States—those areas farthest from larger towns and cities—lacked access to broadband internet at home in 2019. More than one in three, or 36.7 percent, of rural residents did not have high-speed internet access at home.

TABLE 9: ACCESS TO BROADBAND INTERNET AMONG RURAL RESIDENTS, BY NATIVITY, 2019

	Population Lacking Broadband Access	Share of Population Lacking Broadband Access
MICHIGAN		
U.S. Born, Michigan	781,000	53.3%
Foreign-Born, Michigan	11,000	48.6%
Total, Michigan	792,000	53.3%
UNITED STATES		
U.SBorn, Nationally	15,330,000	36.6%
Foreign-Born, Nationally	638,000	39.3%
Total, Nationally	15,968,000	36.7%

Racial and Ethnic Minorities

Racial and ethnic minority groups (including non-white or Hispanic) in Michigan have lower rates of broadband coverage compared to the overall state population. While 25.3 percent of the overall Michigan population lacked broadband internet in 2019, more than one in four people, or 28.2 percent, of racial and ethnic minorities did not have high-speed internet at home. Approximately 669,000 individuals in a racial and ethnic minority group did not have broadband internet access.

Immigrants were less likely to face poorer access to broadband coverage, with 18.3 percent of immigrants in Michigan lacking access to broadband internet compared to 30.1 percent of U.S.-born individuals.

TABLE 10: BROADBAND INTERNET ACCESS, FOR ALL ETHNIC MINORITIES (NON-WHITE OR HISPANIC), 2019

	Population Lacking Broadband Access	Share of Population Lacking Broadband Access
U.S. Born, Michigan	600,000	30.1%
Foreign-Born, Michigan	69,000	18.3%
Total, Michigan	669,000	28.2%
