The Growing Demand for Healthcare Workers in Florida

The United States has faced shortages of healthcare workers for years; a challenge that was only exacerbated by the COVID-19 pandemic. By 2018, even before the pandemic, there were 27 open healthcare practitioner jobs — such as doctors, surgeons, and registered nurses — for every available unemployed healthcare practitioner across the country. And the situation in Florida is no exception. Despite the many barriers that internationally trained healthcare workers face to practicing medicine in the state, immigrants routinely punch above their weight in the field. In 2019, they made up 25.1 percent of the state’s healthcare workers — including 35.7 percent of all physicians and surgeons — while making up 21.1 percent of the population.

For Florida to remain competitive and address critical shortages of physicians and other healthcare workers, it will be crucial to implement policies that not only attract and retain global talent that is complementary to the U.S.-born workforce, but that also build career pathways for immigrants who already call the state home.

One way to achieve this goal is to join states like Minnesota and Washington in reducing barriers for international medical graduates (IMGs) and other internationally trained healthcare workers.

In light of the COVID-19 pandemic, labor shortages, and a growing number of baby boomers who are reaching retirement age each year, Florida has seen an increase in demand for healthcare workers.

From 2017 to 2021, there were 1,324,973 unique healthcare worker job postings in Florida, an increase of +80.1%.

During the same time, the advertised wages also rose from $28.37 to $34.65 per hour, or +$6.28/hr.

From 2017 to 2021, the top five in-demand healthcare jobs in Florida were:
1. Registered Nurses
2. Medical Records Specialists
3. Licensed Practical and Licensed Vocational Nurses
4. Physicians
5. Clinical Laboratory Technologists

During the same period, the top Florida employers hiring healthcare workers were:
1. HCA Healthcare
2. Advent Health
3. Baptist Health
4. Healthcare Employment Network
5. Orlando Health
The Growing Demand for Healthcare Workers in Florida

Online Job Postings for Healthcare Workers, 2017 – 2021

- Optometrists: +439.5%
- Dental Hygienists: +318.2%
- Opticians, Dispensing: +248.5%
- Psychiatric Technicians: +181.0%
- Dentists: +145.1%
- Licensed Practical and Vocational Nurses: +137.0%

As employers struggle to recruit and retain specialized healthcare workers, immigrants play a crucial role in helping to address labor shortages. With an increase in demand for multilingual and culturally competent employees, internationally trained healthcare professionals are uniquely positioned to provide support across all healthcare settings.

The average share of healthcare workers from 2015 to 2019 who were immigrants:

- Dentists: 31.4%
- Psychiatric Technicians: 26.9%
- Dental Hygienists: 26.7%
- Licensed Practical and Vocational Nurses: 26.3%
- Pharmacy Technicians: 16.6%
- Optometrists: 16.6%

From 2017 to 2021, the number of healthcare job postings that required bilingual skills in Florida increased by 204.0%.

Surgeons, Except Ophthalmologists
\[+92.5\%\]

Pediatricians, General
\[+71.5\%\]
The average share of workers from 2015 to 2019 who were immigrants: 20

- **36.4%** Physicians
- **27.9%** Surgeons

**BRAIN WASTE IN FLORIDA**

Although there is a growing need for healthcare workers in Florida, many immigrants who have received specialized education, training, and licensing abroad are unable to practice in the state, facing challenges such as recredentialing and language proficiency. Their skillsets are all too often underutilized — in what is known as “brain waste” — which frequently leads to under- or unemployment. 21

**In 2021, across Florida:** 22

Share of residents who had a biology or healthcare-related bachelor’s degree but worked in an occupation that did not require a bachelor’s:

- **27.1%** FOREIGN-BORN
- **24.2%** U.S.-BORN

- **39.4%** of immigrants with professional and doctorate degrees 23 worked in occupations in the healthcare industry that did not require a medical doctorate or professional degree.

*Addressing the barriers that prevent additional qualified, internationally trained healthcare workers from practicing in Florida will be vital to helping the state meet its growing healthcare needs.*
ENDNOTES

2. Unless stated otherwise, all data in this report is reflective of Florida.

3. We define an immigrant as anyone born outside the country to non-U.S. citizen parents who is a resident in the United States. This includes naturalized citizens, green card holders, temporary visa holders, refugees, asylees, and undocumented immigrants, among others.

5. Ibid.

8. Ibid.

9. Ibid.

10. Ibid.

11. Ibid.

14. Using the 2013 NCHS Urban–Rural Classification Scheme for Counties, Florida counties were grouped into two different population groups: medium and small metropolitan, and rural counties. NCHS medium and small metropolitan counties were combined for the middle classification. Rural counties were identified using the micropolitan and non-core NCHS classifications.

15. Small and medium metro counties in Florida include Alachua, Brevard, Collier, Escambia, Flagler, Gadsden, Gilchrist, Jefferson, Lee, Leon, Manatee, Marion, Martin, Polk, St. Lucie, Santa Rosa, Sarasota, Volusia, Wakulla, Bay, Charlotte, Citrus, Gulf, Highlands, Indian River, Okaloosa, Sumter, and Walton counties.

23. Doctorate degrees include the fields of Biology and Life Sciences, Nuclear, Industrial Radiology and Biological Technologies, and Medical and Health Sciences and Services.
