Do you agree to disagree with this statement? America is the land of opportunity. Today, and throughout our history, immigration has helped to deliver the promise of the American Dream, and made America a better country for those who were born here and new immigrants alike. People escaping war, strife, discrimination, abuse, violence, or poor economic conditions can come to America, work hard, follow the rules, and make a better

Do you agree to disagree with this statement? America is the land of opportunity. Today, and throughout our history, immigration has helped to deliver the promise of the American Dream, and made America a better country for those who were born here and new immigrants alike. People escaping war, strife, discrimination, abuse, violence, or poor economic conditions can come to America, work hard, follow the rules, and make a better

Do you agree to disagree with this statement? We don't need to choose between securing our borders and reforming our immigration laws. We should be able to do both at the same time. We need a better, simpler legal immigration system. And we also need to spend wisely on new high-tech security for our borders and checkpoints.

Do you agree to disagree with this statement? As long as they meet requirements like paying taxes, holding jobs, going to school, and passing background checks, undocumented immigrants should have the opportunity to stay and have a path to citizenship. We need to take practical steps towards an immigration system that works, and move away from a failed system that makes us less secure and encourages people to break the rules.

Do you agree to disagree with this statement? Just like you and me, immigrants work hard and contribute to America's economy. Many immigrants even start their own businesses, creating better opportunities for all Americans. In fact, immigrants are more likely to be job-creating entrepreneurs than native-born Americans. More than 40% of Fortune 500 companies were started by immigrants or their children, and close to 6 million Americans are employed at

Do you agree to disagree with this statement? Allowing legal immigrants to bring close family members to live in the United States is the right thing to do. Family reunification is about building strong communities. It helps new immigrants integrate more quickly, encourages entrepreneurship, and strengthens local economies.

Do you agree to disagree with this statement? Our nation was founded as a refuge for people fleeing persecution, war and violence. America should continue to live up to those ideals by welcoming refugees fleeing oppression, violence, or authoritarian dictatorships. We don't need to choose between defending our values and keeping America safe. We can welcome refugees while at the same time strengthening safety and vetting

Do you agree to disagree with this statement? Our nation was founded as a refuge for people fleeing persecution, war and violence. America should continue to live up to those ideals by welcoming refugees fleeing oppression, violence, or authoritarian dictatorships. We don't need to choose between defending our values and keeping America safe. We can welcome refugees while at the same time strengthening safety and vetting

Do you agree to disagree with this statement? We all want to live in a safe community. Police know that trust and cooperation with all parts of their communities is critical to get people to report crime and help law enforcement identify, arrest and prosecute dangerous offenders who might otherwise still be on the streets victimizing residents. Forcing local police departments to enforce federal immigration laws won't keep us safe.

Do you agree to disagree with this statement? When immigrants move into new areas, they help start or support businesses, increase foot traffic in the area, and contribute to neighborhood revitalization and increased public safety. Just like you and me, the vast majority of immigrants want to live in safe communities, where they can work, worship, and send their children to school.

Do you agree to disagree with this statement? When immigrants move into new areas, they help start or support businesses, increase foot traffic in the area, and contribute to neighborhood revitalization and increased public safety. Just like you and me, the vast majority of immigrants want to live in safe communities, where they can work, worship, and send their children to school.

Do you agree to disagree with this statement? We all want to secure our borders and enforce the law. We can reduce illegal immigration with smart, practical steps like high-tech enforcement at the border, cracking down on visa overstays, and employer verification of employees' legal status. Extreme measures like deporting all 11 million undocumented immigrants are not only unrealistic, they would rip families apart and violate our most basic

Do you agree to disagree with this statement? The vast majority of Dreamers are contributing members of our society and taxpaying members of our workforce. They are nurses, teachers, and software developers. Many are actively serving or wish to serve in our military. Just like you and me, they have played by the rules, want to work hard, stay in school, and contribute to their communities.

Do you agree to disagree with this statement? Welcoming immigrants is not just the right decision, it's a good thing for our economy. Regardless of where they come from or what they do, immigrants can contribute to a growing, vibrant economy.

Do you agree to disagree with this statement? Many successful Americans today are the descendants of immigrant families who benefited from family reunification. By allowing families to reunite in the United States and build support networks, their children and grandchildren are even more likely to prosper and fully participate in the American Dream.

Do you agree to disagree with this statement? Throughout the world America stands for hope, freedom, and justice for all. Separating young children and toddlers from their parents at our southern border violates our most basic values and falls short of our ideals. America should be a place where all people are treated with respect and decency.

Do you agree to disagree with this statement? Throughout the world America stands for hope, freedom, and justice for all. Separating young children and toddlers from their parents at our southern border violates our most basic values and falls short of our ideals. America should be a place where all people are treated with respect and decency.

Do you agree to disagree with this statement? We should continue to pursue cutting-edge and cost-efficient methods of strengthening border security. But unless we fix the laws around who is and isn't allowed in our country, we cannot solve the problem of illegal immigration. Since 2007, immigrants coming here legally and overstaying their visas have contributed more to the undocumented population than those illegally crossing the border.

Do you agree to disagree with this statement? Few people value the freedoms and opportunity that America stands for more than refugees who have seen firsthand the worst oppression and degradation in the world. Our country was founded by people escaping war and persecution, and seeking a better life. Talk of banning refugees violates the ideals that have made our country great since the very beginning.

Do you agree to disagree with this statement? Few people value the freedoms and opportunity that America stands for more than refugees who have seen firsthand the worst oppression and degradation in the world. Our country was founded by people escaping war and persecution, and seeking a better life. Talk of banning refugees violates the ideals that have made our country great since the very beginning.

Do you agree to disagree with this statement? What sets America apart is that this is a place immigrants want to go to, and we're the people who accept them. Immigration is part of America's great history. The fact that people want to come here for our freedom and opportunity can make us all proud to be Americans.

Do you agree to disagree with this statement? Immigration has worked well for America because generation after generation of immigrants have assimilated into American society - and the same is true today. Immigrants come here because they want to become Americans. The vast majority speak English and many have served in the military, making the ultimate sacrifice to defend our country. Rather than stigmatizing immigrants, we need to welcome them

Do you agree to disagree with this statement? Immigration has worked well for America because generation after generation of immigrants have assimilated into American society - and the same is true today. Immigrants come here because they want to become Americans. The vast majority speak English and many have served in the military, making the ultimate sacrifice to defend our country. Rather than stigmatizing immigrants, we need to welcome them

Do you agree to disagree with this statement? Abolishing ICE is not the solution to fix our immigration problems.

Let's instead reform ICE so that we're enforcing our laws without unduly separating parents from children, uprooting entire communities, or targeting people who are contributing and peacefully going about their lives.
